# 2 Using the Info-Finder

Info-Finder is a tool platform, as shown in **Figure 2-1**. It allows you to search for key product information by product series and model. The key product information includes basic information such as the software specifications, life cycles, and hardware information, and operation and maintenance information such as the licenses, alarms, logs, commands, and MIBs. The hardware-related tools are as follows:

- Product Image Gallery: provides product photos and network element icons for you to produce design drawings and networking diagrams.

- Hardware Configuration: automatically generates hardware configuration diagrams after you select components are required and calculates the weight, power consumption, and heat consumption.

- Hardware Center: provides the technical specifications of devices and components, as well as the mapping between devices, components, and versions.

- 3D Model: provides the product images, product overview, component installation and removal video, and related component information, helping you quickly gain full product information in one-stop mode.

📖 **NOTE**

The heat consumption of a device can be calculated as follows based on its power consumption:

Heat consumption (BTU/hour) = Power consumption (W) x 3.4121
